

MILITARY HEALTH PROFESSIONS SCHOLARSHIP & OTHER PUBLIC HEALTH SERVICE PROGRAMS

An increasing number of health professions students are interested in participating in the various scholarship programs offered by the United States military. Participation in a military health professions program will generally involve the receipt of a full-tuition scholarship and living expense stipend, or post-graduation loan repayment, in exchange for service as a health professions officer. Please contact each military branch for specific information. Although recruiters from the Air Force, Army, Navy, and National Guard often visit Tufts Dental School to meet with prospective applicants, students interested in the various military scholarship programs should contact the respective recruiters directly to ensure that they do not miss important application deadlines. Students awarded any scholarship funding are required to notify the Financial Aid Office immediately upon acceptance of the award.

OTHER PUBLIC HEALTH SERVICE PROGRAMS:

Additional public service programs for health professions students, with associated scholarships or loan repayment opportunities attached, are available through the National Health Service Corps (nhsc.bhpr.hrsa.gov) and the U.S. Public Health Service (www.usphs.gov), including the Indian Health Service (www.dentist.ihs.gov). Please contact the above programs directly for further information.
